

## Senior

### FOR DOGS +7 YEARS

**SATISFACTION SENIOR** provides an ideal, healthy diet for dogs of any breed over 7 years old. Your dog's nutritional needs change when they reach their senior years, due to both reduced activity and changes in their metabolism. At 8 years and over, they need less fat and moderate levels of protein.

### Benefits

-It is very important that dogs grow without any excess weight to avoid potential obesity in the future. The L-Carnitine helps to convert fat into energy, avoiding any potential build-up of fat.

-With its high content of fresh chicken and rice, ingredients that are highly digestible and appetising, it is the ideal food for a healthy and balanced diet.

-The Taurine helps to ensure a healthy heart and good vision.

- Combined, Glucosamine and Chondroitin sulphate help to protect joints by regenerating cartilage and preventing wear.

-The Bioflavonoids, cellular antioxidants (vitamins C and E) that come from citrus fruits, encourage the development of a strong and healthy immune system.

### Ingredients

Rice (36%), dehydrated chicken proteins, fresh chicken (min. 10%), corn gluten, beet pulp, chicken fat, brewer's yeast, liver hydrolysate, dried whole egg, dicalcium phosphate, citrus extracts rich in bioflavonoids (0.00051%), glucosamine (0.004%), chondroitin sulphate (0.004%), Yucca schidigera extract, vitamins and minerals.

### Average analysis
