A RESPONSIBLE DIET FOR HEALTHY PETS

STERILISED

FOR STERILISED CATS AND/OR URINARY TRACT HEALTH

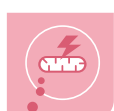

STERILISED cats require a special diet, since their hormonal system makes them prone to obesity and a sedentary lifestyle. Our product is characterised by a moderate supply of energy, a supply of high biological level protein to maintain muscle mass, an optimum level of fibre and a quantity of slowly digested cereals to satiate the appetite and reduce the feeling of hunger. It is more difficult to form stones in acidic urine, for this reason the incorporation of methionine minimises the risk of these stones forming.

TAURINA: EYE AND HEART CARE
